Full job description

Your new company

My client is an automotive industry solutions specialist, providing expert assistance to the local and international market for 35 years. Located in Melbourne's south-eastern suburbs, you will be joining a growing team of highly talented engineers passionate about creative innovating and custom solutions for their global automotive partners. Continuing organisational growth has opened up a number of opportunities within the business.

Your new role

As the Validation Coordinator, you will be responsible for leading extensive validation processes with the goal of minimising field warranty and customer complaints. Key aspects of your role include:

- Design and product validation, experimental and routine testing
- Develop and adhere to project schedules and budgets
- Conducting extensive testing across electrical, mechanical, environmental, compliance, durability and system functional testing
- Create and execute DVP&R test plans
- Review customer performance and test specifications

What you'll need to succeed

In order to be considered for this role, you will need to be able to demonstrate the following:

- Strong familiarity with electronics validation within an industry context
- Understanding of 5S principles
- An extensive array of testing experience across a number of different aspects including electrical and mechanical
- Previous exposure to ISO/TS16949 and/or IATF16949 standards
- FMEA analysis

What you'll get in return

- Scope for development with internal training and growth opportunities
- Join a BRW Top 50 most innovative company
- Project management exposure for those looking to grow their career
- Engage with blue-chip customers within the automotive industry

What you need to do now
